Machine Quilt

ANY SIZE

Project in your home with ease !

Only \$4,600.00

Why was the machine designed?

We developed this machine in response to the needs of the modern day Quilter. Most of us just don't have space for a longarm frame, but still want that large throat space. The Quilting Bee allows you to free motion quilt the large designs you always wanted to do.

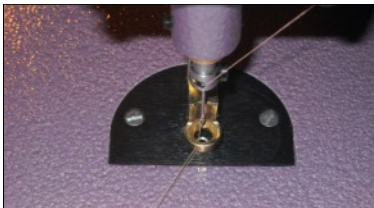

FEATURES

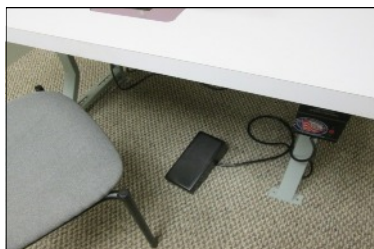

SIMPLE ON/OFF switch mounted right by the operator for easy use.

Easy access to bobbin under the table. Motor below the table out of the way.

Nolting's famous hopping foot for quilting over seams in your quilt

Speed control peddle can be moved to where it is comfortable for you.

Simple to use tensioning device the same we use on our big longarm machines

ADVANTAGES

"The WORK HORSE"

- Your regular sewing machine should be used for the fine sewing for which it was designed.
- Use the Quilting Bee for no feed dog, free motion quilting.
- There is minimal maintenance, just four drops of oil for every 8 hours of sewing.
- Separate bobbin winder eliminates wear and tear on your machine.
- Hopping foot will go over many layers of fabric with ease.
- Work area is directly lighted, no need to have ancillary lighting.
- Less strain on your back, neck and wrists when working with large quilts.
- "M" bobbin.

WORK SURFACE

TABLE: 30"x48" work surface 30" off the ground.
